

Ultra Violet Light System

Stream Filtration UV Systems come assembled on a wall mounted bracket and consists of a 20" sediment filter, stainless steel tubing, connectors and ultraviolet sterilizer. These UV assemblies are for sterilizing the entire water supply for your home with flow rates of 8gpm to 13 gpm at 40,000 mj, The system is equipped to inactivate microorganisms and parasites such as Cryptosporidium and Giardia, harmful bacteria like E.Coli, coliform and viruses not visible to the naked eye.

Ultra Violet Light System Specs

- Made In Canada
- Upgraded Large 20" Pre Filter To Require Less Services
- Change The Uv Lamp Without Interrupting Water Flow
- Easy Removal Of Lamp Without Any Special Tools Required
- Durable Stainless Steel Chamber To Prolong Life And Eliminate Ultraviolet Light Degradation
- 20" 5-micron Sediment Pre-filter To Reduce Particles In The Water
- Capable Of High Flow Rates
- Environmentally Friendly
- No Harmful Chemicals Required
- Long Life Coated Ultraviolet Lamps
- Electronic Ballast Controller With Both Visual And Audio Failure Alarms
- 99.9999% Destruction Of Bacteria, Virus And Protozoan Cysts (Giardia Lamblia And Cryptosporidium)
- 3 Year Warranty Except Consumables
- Product Certified By Csa And Ce
- True Lamp Current Closed Loop Control
- Annual Lamp Change Timer
- Domed Quartz Sleeve For Easy Service
- No Tools Required For Regular Servicing
